

Accessing NCShare for Research

Your App State username and password are used to access NCShare. [Watch a video of the NCShare Account Claim Process](#).

If you have not yet accessed the NCShare cluster before, you must first register using this link:

https://ncshare-com-01.ncshare.org/registry/co_petitions/start/coef:1

Then you can use the **cluster management center** using this link:

<https://ood.ncshare.org/>

Be sure to type in **Appalachian State University** as the institution.

Once you are logged into the **Open OnDemand dashboard**, navigate to **Interactive Apps** and then click on **Shell**. You can create a Shell instance with your chosen specifications. **It will take a few minutes** for the connection to be created, but then you will see a **Connect button** that launches your Shell session.

For help with NCShare, [visit their documentation here](#) or [contact Systems and Research Computing](#)
